

Purpose:

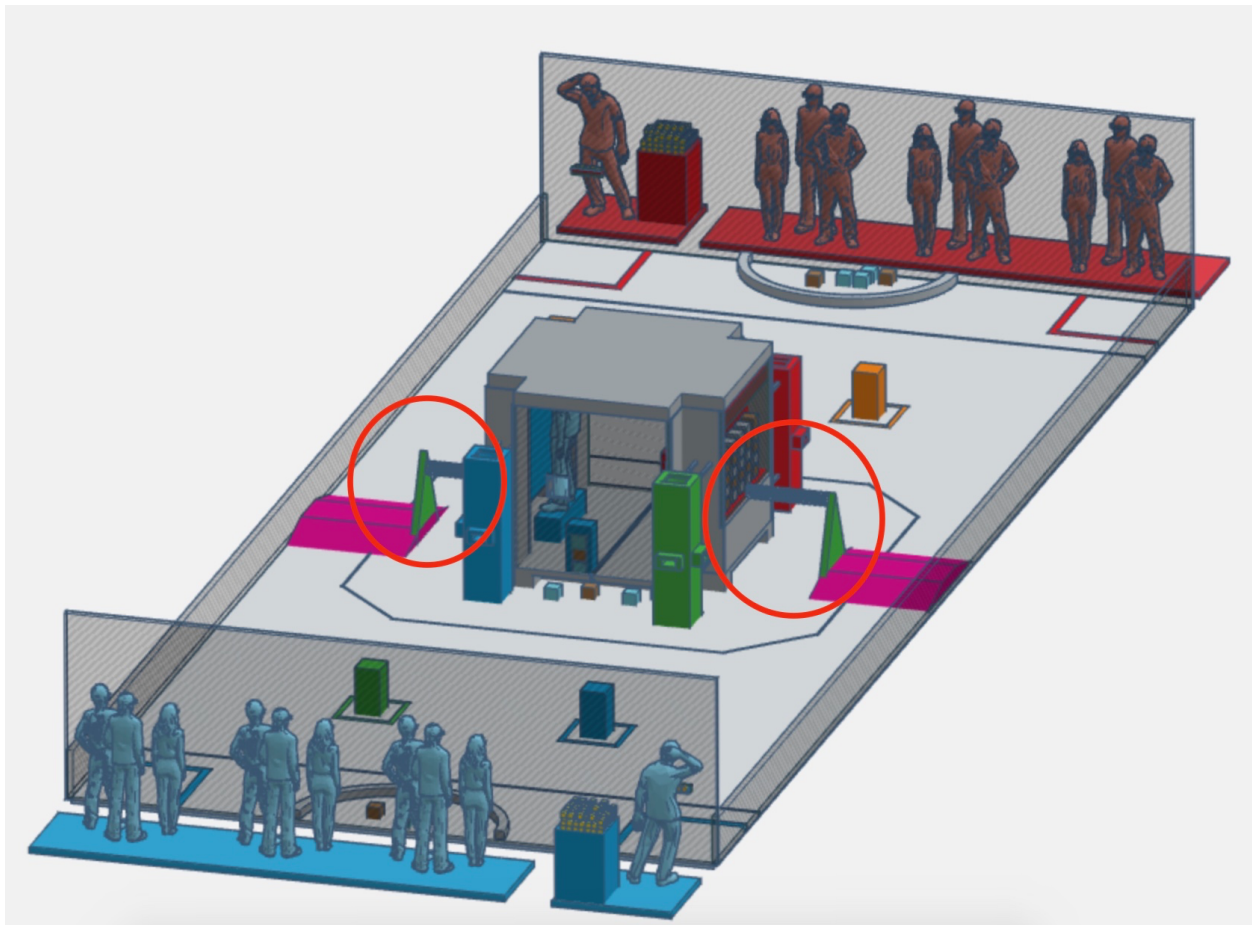

Teams need to maneuver underneath the chain or around it via the Ramp. This serves to encourage teams to think more about their height limitations, as well as what wheels teams choose to use.

Dimensions:

- 3.5' long
- Secured 3' high off of the field floor
- The Chain would be made of the same materials as the one provided in the 2021 Kit of Parts.

Where is it Located?

- Located in the central-outside edges of the field, attached with a triangle-shaped panel on either side of the Keystone

Symbolism:

Chains can symbolize connectedness and unity. In fact, the *FIRST*[®] logo is a chain! This symbolizes how all of the teams, coaches, and everyone at *FIRST*[®] are united through robotics.

In *FIRST*[®] ReUnited!, the chain symbolizes the link between STEM and the real-world. By maneuvering underneath the chain or around it via the Ramp, teams avoid breaking the link between STEM and the real-world. Without applying the principles of STEM into the real-world, our society would be drastically different today!
